We also participate in national health reform efforts and may use and share information as permitted by law to achieve regional or national goals, including regional or nationally approved population health management or wellness initiatives.

The most common way we do this is through local or regional health information exchanges (HIEs). From time to time, we may also take part in state- or nation-wide internet-based HIEs. As permitted by law, your health information will be shared through the HIE to provide faster access, better coordination of care and to assist us, other healthcare providers, health plans, and public health officials in making more informed decisions.

HIEs help doctors, hospitals and other healthcare providers within any geographic area provide quality care to you. If you travel and need medical treatment, HIEs allow other doctors or hospitals to electronically contact us about you. This helps us manage your care when more than one doctor is involved. It also helps us to keep your health bills lower (by avoiding repeated labs and tests). And finally, it helps us to improve the overall quality of care we provide to you and other patients.
